

Exercise 3.2. What concerns me about money?

AAWID -individually or by group- are invited to reflect on their own economic situation, focusing on how to optimize the income and the spendings when they get older. Some examples to reflect could be:

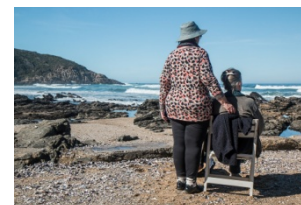

- Who will take care of me?

- Will I need to move to other accomodation? Will I be able to aford it?

Residence for the elderly	Residence for people with disabilities	Own housing
		

- Who will help me with money management? (family members, caregivers, friends...)

- Will I have enough money to cover my new needs?

Once AAWID has expressed their concerns, the educator will search for potential solutions such as talking to his/her family members about those concerns, seeking help from others, etc.

Finally, the educator is suggested to focus on the right of the person to decide how to manage his/her own money. He/she will open a debate.

Reflection and debate: Do I have the right to manage my own money?
